Office Action Summary	Application No. 10/715,390	Applicant(s) TANAKA ET AL.	
	Examiner Adolf Berhane	Art Unit 2838	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-4 and 12-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Bruning (6,339,314).

Bruning disclose a battery charger with low standby power dissipation in Figs. 1 and 2. Stopping a power supply to the transformer (30) when an output side of the current-to-voltage conversion circuit (10) in a no-load state (see col. 1, lines 62-66) and starting a power supply to the transformer when an external voltage is applied to the output side of the current-to-voltage conversion circuit (col. 1, line 67 to col. 2, line 2) wherein the external voltage is applied to the output side of the current-to-voltage conversion circuit in a deactivated state, by controlling ON and OFF states of a switching circuit (2) within an electronic apparatus to which the current-to-voltage conversion circuit is coupled an input section to input an input power (12, 14) a transformer to convert the input power into an output power (16, 18) an output section to output the output power, sensing circuit (104), threshold detector (112) and timing circuit (114).

Allowable Subject Matter

3. Claims 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclose to teach a power supply control with a first coupler circuit including a photo coupler to couple an output of the first comparator and an input and a second circuit includes a second comparator to compare an output voltage on a secondary side of the transformer and threshold voltage.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
